Role-based Management
Access network maps, configuration, alerts, notifications, reporting, and management console

Common Product Architecture
Product family is built on single core framework that provides transparent upgrade path, consistent usability, lowest possible TCO
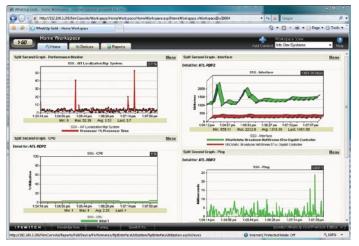

Network Management Complexity Simplified

WhatsUp Gold® Premium Edition provides an extensive and cost-effective out-of-the-box single site management and monitoring solution for networks of all sizes. Get 360º visibility, actionable intelligence, and complete control with WhatsUp Gold.

WhatsUp Gold:
- Discovers and maps all your network devices and systems automatically
- Notifies you proactively as problems occur on your network
- Presents both instantaneous and historical reporting
- Provides reliable anytime, anywhere network management

In today's business environment, the network is the business. Without it, doing business as we know it would simply not be possible. From e-commerce, email, and IM to VoIP, video, and collaboration, a robust, well-managed network is vital to achieving business success.

WhatsUp Gold Premium Edition delivers comprehensive, easy to use application and network management that shows you the entire network in minutes with powerful discovery and mapping capabilities. Predictive SNMP and WMI monitoring, along with powerful alerting and notification features, help you quickly identify and resolve network problems. Intuitive Windows and Web-based interfaces use dashboards to deliver real-time access to more than 150 reports, giving you vital information on keeping your network strong and healthy.

Split Second Graphs provide instantaneous access to critical performance data in real time.

360° Visibility

WhatsUp Gold provides 360° visibility to your network, allowing you to see all applications and network devices at a glance. With dynamic discovery and mapping, WhatsUp Gold builds a hierarchical network map for an easy-to-understand view of your network. Instantaneous alerting keeps you informed, with up-to-the-second status on every enabled monitor. Split Second Graphs provide real-time status updates whenever you move your cursor over enabled fields.

Actionable Intelligence

WhatsUp Gold delivers more than just information — it gives you actionable intelligence you can use to make informed decisions to improve the health and stability of your network. The intuitive management interface provides simple navigation and rapid access to the information you need, where and when you need it. Configurable instant notifications keep you informed of network status and alerts, while comprehensive, out-of-the-box reporting provides critical data.

Complete Control

WhatsUp Gold lets you take control of your network and application infrastructure to drive business results. Proactive and predictive monitoring of devices, systems, applications, and services helps you resolve problems before users encounter them. And you can be confident that your network management solution is fully secure. With SSL-based Web console access you have a choice of self-signed or trusted certificates from VeriSign, Thawte, and other leading security providers.

Scalable Product Family Architecture

WhatsUp Gold Premium is part of the Ipswitch™ WhatsUp Gold family of network management solutions that also includes WhatsUp Gold Standard, WhatsUp Gold Distributed, and WhatsUp Gold MSP. The WhatsUp Gold product family grows with you as your network grows in size and complexity. This smooth, transparent migration path supports your needs and delivers the lowest possible total cost of ownership. There's no need to evaluate, configure, and learn a new product as your network grows. From single-site to multisite networks, WhatsUp Gold provides a consistent user interface, management structure, and reporting capabilities.
